# SPECIAL ORDER PROCESS

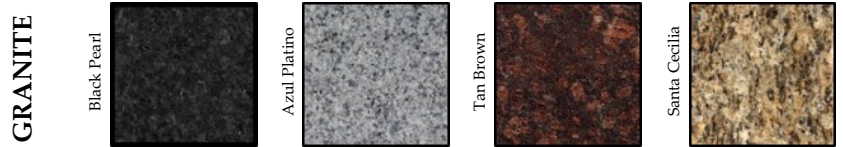

## Step 1

Choose your desired model which relates to the size/shape and determines pricing.

## Step 2

Choose your desired tabletop color and edge profile.

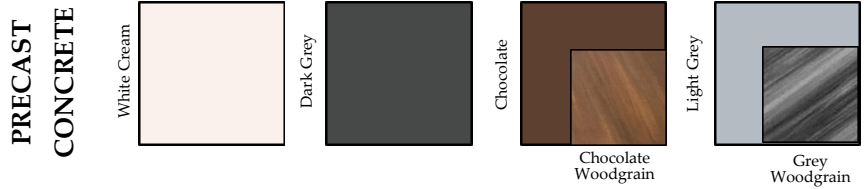

\*Only granite options come in polished or rockface edge profiles

"Naples" & "Santorini" models not used with a PreCast tabletop.

PreCast = Polished Edge Only

## Step 3

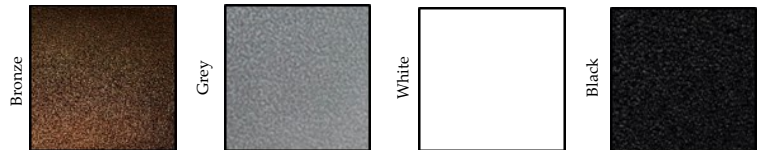

Choose your desired base enclosure style & height.

- a. Mini or Standard
- b. 21" Chat or 24" Casual Dine Height

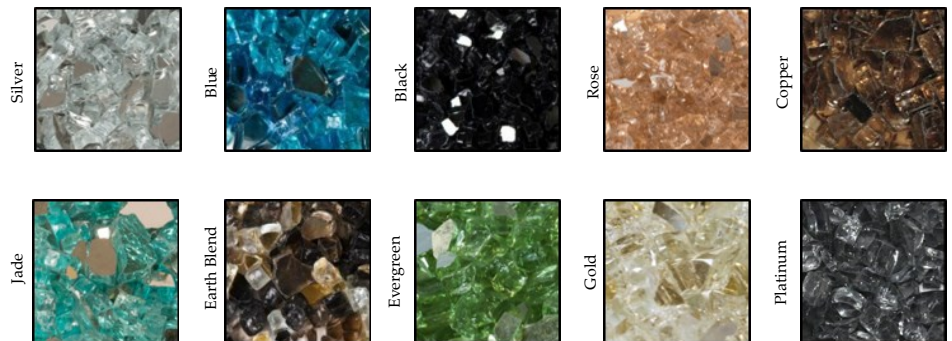

## Step 4

Choose your desired base enclosure powder coat finish.

## Step 5

Choose your desired 1/4" reflective re glass. (20#'s Included with purchase)

# OUR TABLETOPS

## Granite Tabletops

Our granite table tops are offered in both 2cm and 3cm thicknesses on most table selections.

2cm Granite = 3/4" Thick (+/- 1/16")

3cm Granite = 1-1/4" Thick (+/- 1/16")

Granite is a natural stone and a product of nature. Therefore, variations in color, pattern, texture and veining is expected and may vary from the sample. These differences and variations in stone should be considered as the beauty of natural stone instead of flaws.

### Pretreatment & Resealing of the Granite Top:

All Firetainment Inc. stone tabletops are pre-treated with an impregnating sealer that penetrates deep into the porous surface providing a long lasting barrier that locks out oils, water, stains and dirt. Spills should be wiped up quickly to avoid any staining on the surface. Sealing of the granite is a simple "wipe on, wipe off" process, and stone sealers are readily available at most hardware, tile and stone countertop stores, or home improvement stores.

We recommend using the "GQ 314P Premium Impregnator" available from [www.GranQuarry.com](http://www.GranQuarry.com) should a store not be nearby.

*\* Each stone cover may be cut from a separate piece of stone, therefore color, tone, & texture may differ from the tabletop itself.*

## PreCast Concrete Tabletops

All of Firetainment's GFRC PreCast concrete tabletops are custom poured to order. By using the industry's best pre-blended glass fiber reinforced concrete system, our GFRC tabletops come ready to use due to a high early strength pre-blended two-component mix design. Each casting of our tabletops have varying cure periods determined by the weather and external conditions during each pour. This makes each piece unique in nature and requires weather dependent time

periods for each tabletop to cure for maximum strength. Our PreCast material exceeds the performance of standard GFRC formulas with its impressive 10,500 PSI compressive strength and 1,450 PSI flexural strength. Our beautiful, hand-crafted PreCast tabletops have been catching everyone's attention since releasing them in 2017. Each tabletop comes pre-sealed for protection, but we recommend a full table cover for added protection against the elements.

*\* PreCast tabletop are not available for the "Naples" model. Color variations in tone will differ from the sample tiles.*

# OUR BASE ENCLOSURES

**The Firetainment** base enclosures are made of American manufactured corrosion resistant 5052-H32 marine grade aluminum alloy and fabricated using only the most advanced manufacturing techniques available today.

- Each base enclosure comes pre-assembled and is equipped with stainless steel hardware and adjustable leveling feet.
- Our powder coating process utilizes an eco-friendly, state-of-the-art six stage pretreatment process to ensure superior paint adhesion and exceptional corrosion protection against the finish.
- The tapered design of the base is stylish and conceals the fuel source and all stainless steel gas connections.
- The magnetic access door can be removed by simply pulling the handle to release the magnet, revealing the inside storage area for your standard propane tank or access to your gas supply piping.

Available in two (2) different styles, two (2) different heights and four (4) different powder coat finishes:

Base Types

**Mini Base Enclosure** - Comes standard with any table 36" or smaller and includes an LP tank foot. (Shown below)

**Standard Base Enclosure** - Comes standard with any table 42" or larger and includes a SS LP tank drawer slide. (Shown below)

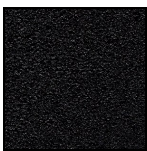

Base Heights

**21" chat height** - Ideal for low profile seating such as a couch or loveseat.

**24" casual dine height** - Ideal for standard seating and to allow for more comfortable cooking and leg room.

**Standard Base**  
(SS Tank Drawer Included)

**Standard Rectangle Base**  
(SS Tank Drawer Included)

# OUR BURNER ASSEMBLIES

## Burner Component Specifications:

- Our burner system's **stainless steel components** are extremely durable, create protection against accidental puncturing of the gas lines, helps prevent damage from the outdoor elements, and helps protect against pests that may chew through the gas lines.
- Each of the included gas connection kits are made of **stainless steel hoses** vs. standard rubber connections.
- The **manual valve assembly** is constructed of **brass fittings** which are strong factors in preventing rust or corrosion and is positioned next to the door panel for easy lighting of the table.
- The burner's ignition system is "**match-lit**" ensuring a very reliable and easy to use feature that will work EVERY time you use it.
- The **control knob can adjust the burner's flame height** from one to twenty inches (1"-20"+) giving a wide range of climates to use the appliance in.
- Our burner pan's are made of **304 stainless steel** and have a **high heat ceramic coating** that reduces heat transfer to the table. This coating also enables the ability for 'touching-up' the burner pan should it get scratched or scuffed in any way and prevents discoloration of the stainless steel pan itself.
- The **12" 304 stainless steel Penta burner & 18" Linear burner** help optimize the flame ensuring a consistent symmetrical flame output. This creates an unmatched focal point at the center of each model pit table.
- Our burner system operates with a standard (LP) propane tank or (NG) natural gas system at a very efficient **45,000 BTU's**. (*Std LP Tank = 15+ hours of burn time on medium*)
- A **natural gas conversion kit** can be added to any pit table order at no additional cost at the time of the order being placed. *Once the order has been placed and has shipped, a natural gas conversion kit has an added cost.*

# OPTIONAL ACCESSORIES

## Matching Stone Burner Covers

Add one of our matching stone burner covers to enhance your pit table’s functionality and design. When you’re not using your Firetainment table for the ambiance of the fire or the utility associated with our patented universal cooking package, this add-on piece allows for the use of the complete tabletop surface for a multitude of different functions. Play games, add a centerpiece, or simply layout lunch while enjoying your pit table with family and friends outdoors.

Each “Matching Stone Burner Cover” comes in the shape of your pit table and matches the color of stone as your tabletop. These unique covers are one of our most purchased accessories outside of the patented universal cooking package.

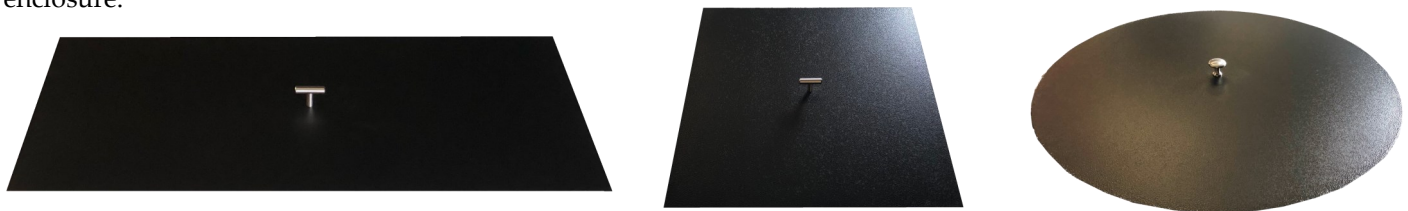

*\*Each stone cover may be cut from a separate piece of stone, therefore color, tone, & texture may vary from your actual tabletop’s surface.*

## Matching Aluminum Burner Covers

Add one of our matching aluminum burner covers to enhance your pit table’s functionality and design. When you’re not using your Firetainment table for the ambiance of the fire or the utility associated with our patented universal cooking package, this add-on piece allows for the use of the complete tabletop surface allowing the use of the entire tabletop surface.

Each “Matching Aluminum Burner Cover” comes in the shape of your pit table and matches the finish of your base enclosure.

# OPTIONAL ACCESSORIES

## Tempered Glass Wind Guards

Each of our wind guards are made of 3/16" thick tempered glass panels to handle the high heat produced by the pit table and stand 6" tall on table's surface. Our tempered glass wind guards are offered in round, rectangle, and square to match the shape of your pit table and each includes all necessary hardware.

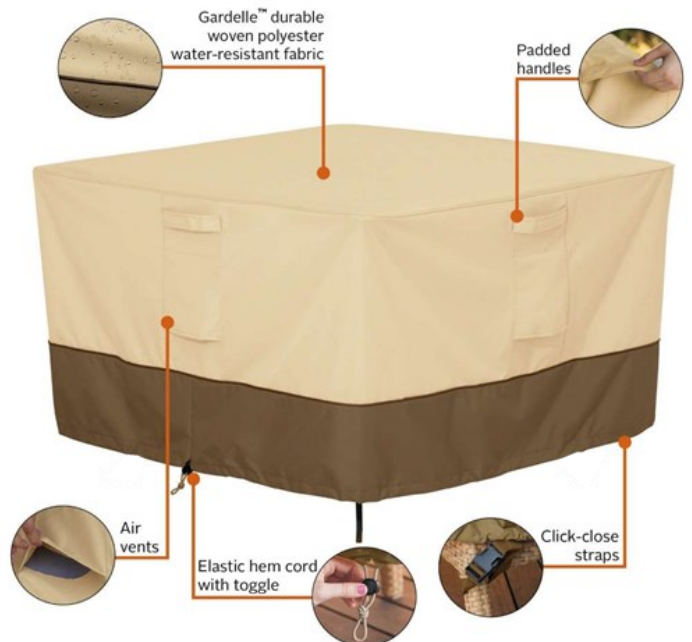

Each wind guard comes with four (4) top corner brackets and four (4) bottom corner brackets with rubber feet that ensure your tabletop does not get scratched when in contact with the wind guard. *Wind guards come unassembled.*

Scan the **QR code** to see our wind guard assembly instructions.

## Full Fire Table Covers

Each of our full table covers have:

- Three-year limited warranty
- Gardelle™ Fabric System features an elegant fabric top with a protective water repellent and resistant laminated backing and a protective dark splash guard skirt
- Click-close straps snap at front to secure cover on the windiest days
- Elastic hem cord for a tight and custom-like
- Air vents reduce inside condensation and wind lofting

  
**OPTIONAL ACCESSORIES**

The Firetainment Inc.  
Fire pit table  
**COOK BOOK!**

**Our Patented - Universal Cooking Packages**

Our optional *patented* “Universal Cooking Package”, which can be added to any our fire pit table designs, allows for the most dynamic fire pit table on the market today.

Cooking meals on your fire pit table at home brings your family back around the dinner table, promotes quality bonding time over meals, and allows for more interactive time together away from today’s many different electronic devices.

Our patented “Universal Cooking Package” includes the following components: to match your fire pit table shape.

***Package Includes:***

- (1) Tempered Glass Wind Guard
- (1) Universal Cooking Mount
- (1) Cast Iron Griddle
- (2) Himalayan Salt Cooking Blocks
- (1) Surface Mount Thermometer
- (2) Cooking Utensils

# FREIGHT & SHIPMENTS

Each Firetainment order is carefully shipped in our uniquely designed packaging. Each tabletop is shipped in a custom fabricated wood crate with the table base and all other pre-assembled components within a single box. We have the lowest breakage and/or damage to outbound shipments due to the extreme measures we take to ensure your order arrives as intended.

## Custom Fabricated Crate Information:

Each tabletop is shipped in a custom fabricated wood crate which varies in size depending on how many tables were in the order (1 to 6 tops per crate).

Each table top sits on 1-1/2" closed cell foam inside the crate to ensure shock protection.

Each top is secured with plywood to prevent any shifting of the table while in transport and protects the tabletop's finish.

## Fire Pit Table Base Pallet Information:

The pre-assembled table base enclosure, the pre-assembled burner assembly, the fire glass, and any options chosen are palletized within a single box for easy storage/transport.

The pallet and box measurements are dependent on the products purchased. Should you need exact measurements please call our offices at 1.888.769.3444.

Each pallet is forklift-able from two sides for easy transporting.

# GRANITE CARE & MAINTENANCE

**WARNING:** UPON INITIAL START UP OF THE FIRE PIT TABLE DO NOT SET FLAME ON HIGH. HIGH HEAT MAY CAUSE THE GRANITE TO CRACK DUE TO MOISTURE EXPANSION. PLEASE SET FLAME TO LOW AND ALLOW 30 TO 45 MINUTE FOR TABLE TO SLOWLY WARM UP AND ELIMINATE ANY POSSIBLE MOISTURE.

Please review and follow this 'Care & Maintenance' guide to avoid any damage to your table or denial of a warranty claim due to lack of consumer maintenance. Resealing of the tabletop is **required** seasonally (Twice per year) to prevent the absorption of moisture and staining. The re-sealing of the granite should be before and after the harsh winter months.

**USE EXTREME CAUTION:**

1. Do not operate the pit table in windy conditions or allow the flame to overheat the granite tabletop. This can cause cracking and therefore should be monitored closely. If the tabletop starts to overheat, slowly lower the flame until the table is cool. This will allow the tabletop to evenly cool and minimize the chance of the tabletop cracking.
2. Be sure to clean the granite tabletop on a regular basis with warm water and a soft cloth to remove dirt and dust debris. If a more thorough cleaning is required, use a non-ammonia based, non-abrasive cleaner, such as a water-based PH neutral cleaner like "Simple Green".
3. All Firetainment Inc. granite tabletops are pre-treated with an impregnating sealer that penetrates deep into the porous surface providing a long-lasting barrier that locks out oils, water, stains and dirt. Spills should be wiped up quickly to avoid any potential staining of the surface. Sealing of the granite is a simple "wipe on, wipe off" process, and granite sealers are readily available at most hardware, tile, stone, or Home Depot/Lowes stores. We recommend using the "GQ 314P Premium Impregnator" available from [www.GranQuar.com](http://www.GranQuar.com) should a store not be nearby.
4. While the pit tables can be placed in any outdoor space, it is important to **avoid prolonged exposure to direct sunlight and precipitation**. Both elements can cause damage over time to the tabletops if the 'Care & Maintenance' is not followed on a routine basis as described.
5. **Never use abrasive cleansers** (like comet or borax powders) or abrasive tools (like steel wool pads) on any part of your Firetainment table as these items can easily scratch the surface.

Should you have any questions or concerns in regards to the care or maintenance of your Firetainment pit table please call us at **1.888.769.3444** to speak with a member of our team or you can send an email to '[Contact@Firetainment.com](mailto:Contact@Firetainment.com)'. A team member will get back to you as soon as possible.

# PRECAST CARE & MAINTENANCE

Please review and follow this 'Care & Maintenance' guide to avoid any damage to you able or denial of a warranty claim due to lack of consumer maintenance.

1. Concrete can be cleaned with warm water and a soft cloth to remove dirt and dust debris. If a more thorough cleaning is required use non-ammonia based, non-abrasive cleaners, such as a water-based PH neutral cleaner like "Simple Green".
2. If stain occurs suggested procedure is to thoroughly saturate a paper towel with your choice of non-ammonia, non-abrasive PH neutral cleaner and place over stain until paper towel becomes completely dry. Then scrub the stain with a paper towel if necessary.
3. Do not allow any liquids or debris to remain on the concrete tabletop for any extended period to avoid any possibility of staining to occur. (I.E. rainwater, irrigation water, pool water, beverages, leaves, grass and dirt.
4. *We strongly recommend one of our fire pit table cover to protect your table.*

Should you have any questions or concerns regarding the care and/or maintenance of your Firetainment table please call us at **1.888.769.3444** to speak with a member of our team or you can send an email to **'Contact@Firetainment.com'**.

A team member will get back to you as soon as possible!

## **FIRETAINMENT WARRANTY**

### **TABLE TOP WARRANTY:**

Firetainment Inc. offers a (1) year warranty on table tops valid only with proper maintenance from the date of delivery. This limited warranty covers craftsmanship and the structural components of the table top. Firetainment Inc., at manufacturer's option, will repair or replace any table top found to be defective during this warranty period. This warranty is void should any of the following occur: 1. Incorrect installation by the retailer or customer; 2. Damage caused by accidents; 3. Misuse; or 4. Alterations made by anyone other than Firetainment Inc.

This warranty does not apply to the use of another manufacturer's table top, nor does it apply to the incorrect installation of the table top onto the base, by the retail store or end user. This warranty does not apply to any damage caused by shipping, accidents, fading, staining, natural weathering, misuse, alterations or repairs. Firetainment's stone table tops are extremely durable and once positioned onto the base only consequential (accidental) damage or misuse can occur. Misuse of the fire table includes, but is not limited to: sitting or standing on the table top; operating the fire table under windy conditions (Which can blow the flame across the stone top leading to potential cracking); or not following the 'Owner's Manual' as required.

***Please Note:*** It's highly recommended to use a tempered glass wind guard under windy conditions; however, this is not a full proof deterrent. The owner is required to periodically check the stone near the burner pan to ensure it is not getting too hot. If you notice the stone table top getting too hot, slowly turn the flame down while gradually reducing the heat until ambient temperature is achieved.

### **COMPONENT PARTS WARRANTY:**

Firetainment extends a five (5) year warranty on all burner components under normal use and proper maintenance. Firetainment, at factory option, will repair or replace any outdoor fire pit burner component found to be defective during this warranty period. Regular maintenance must be exercised as set forth in the owner's manual.

### **FIRE TABLE BASE ENCLOSURE WARRANTY:**

The Firetainment fire table base enclosure comes with a twenty (20) year structural warranty when properly maintained while in residential use. Firetainment will, at factory option, repair or replace any base enclosure that has failed structurally during normal use and regular maintenance.

### **POWDER COAT FINISH WARRANTY:**

Firetainment offers a five (5) year warranty against blistering or peeling of the base finish under normal use and proper maintenance. Firetainment will, at factory option, refinish or replace the base enclosure if the above occurs within a five (5) year period from the date of purchase. Occasional rust seepage from crevices and hidden unfinished surfaces inherent in some designs is considered a care and maintenance function and is not considered a finish failure. To retain the warranty regular care and maintenance is required. Extra care and maintenance is required in coastal areas due to high salinity in the atmosphere.

***\*All warranties apply to the original owner only and begin at the date of purchase. Proof of purchase is required with all claims.***
